## The Choice is Clear.

### THE FCD-160 FLEXIBLE IMPACT TRAFFIC DOOR

The heavy-duty FCD-160 impact traffic door from Eliason operates on the industry's best top mounted gravity hinging system and is designed to survive in the toughest industrial applications, while providing maximum visibility for increased safety. The door body consists of .160" thick PVC with 48" high textured vinyl impact plates laminated on both sides. Jamb edge balloon seals, bottom wiper seals and top wipe seals are all standard. The double layer bracket pocket is reinforced for maximum panel security and durability. The FCD-160 not only provides excellent visibility – it's built Eliason tough!

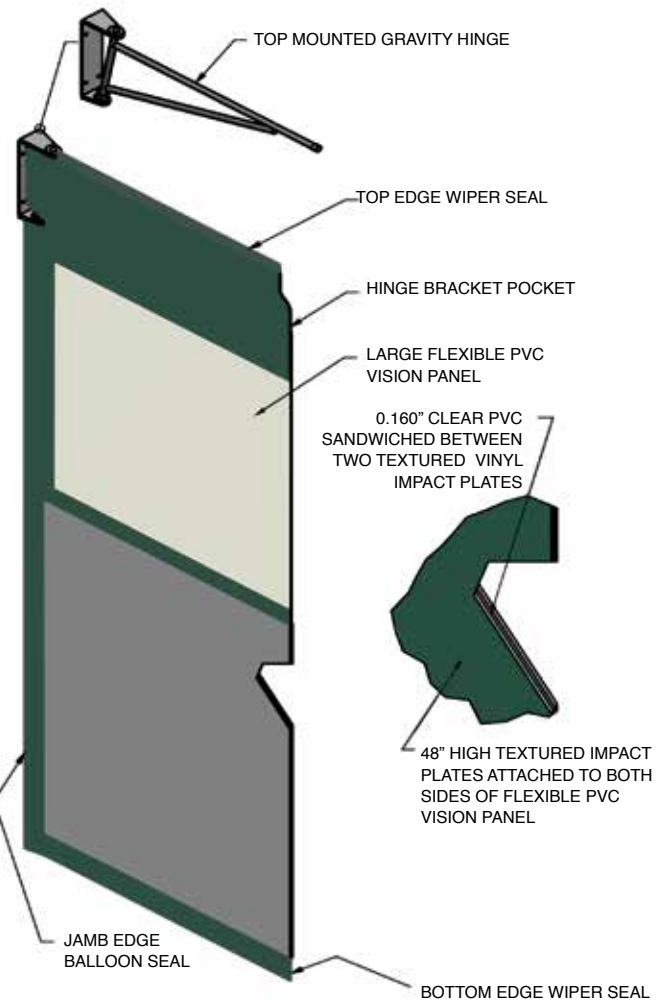

# Eliason FCD-160 Doors

product **features**  
& specifications

## Engineered For Heavy Duty Use

- Top Mounted Only Gravity Hinge System**  
 No bottom hinge to damage or maintain. Leaves full width in clear available for passage of wide loads.
- .160" Thick PVC Door Body with Textured Vinyl Impact Plates 48" High on Both Sides**  
 Large clear integral window area provides excellent visibility for added safety in high traffic areas. Textured vinyl impact plates are impact and abrasion resistant. Hinge bracket pocket is constructed with two-ply reinforced vinyl-coated nylon material. Bi-parting models have 3" overlap at center. Hinge bracket pocket colors available in black and forest green.
- Standard Jamb Edge Balloon Seals, Bottom Wiper Seals and Top Wiper Seals**  
 Provide the best seal possible in a flexible impact traffic door.
- Tough Durable Design**  
 Suitable for heavy motorized traffic.

## Specifications

**DOOR BODY:** .160" thick PVC with 48" high textured vinyl impact plates on both sides, jamb-edge balloon seals and wiper seals at top and bottom of each door panel. Large flexible PVC vision panels for maximum visibility. Hinge pocket is constructed with two layers of reinforced vinyl-coated nylon material. Bi-parting models have 3" overlap at center. Hinge bracket pocket colors available in black and forest green.

**HINGES:** Eliason heavy-duty, top mounted, gravity-operated hinges allow the door panels to open easily and close automatically. Top mounted only design leaves maximum WIC available for passage of wide loads.

**APPLICATIONS:** Cold Storage Facilities; Walk-in Coolers; Shipping and Receiving Areas; High Volume Industrial Openings
