

THE ELIASON® FLT-400 SERIES

# The Industry's Most Durable Flexible Impact Traffic Door

## THE ELIASON® FLT-400 FLEXIBLE TRAFFIC DOOR

From top to bottom, the Eliason FLT-400 is the toughest, most dependable flexible impact traffic door available. It all starts with the industry's most reliable top-mounted gravity hinge system – and that's just for starters. The FLT-400 door body is constructed of two layers of USDA accepted, two-ply, heavy duty, low temp (good to minus 30 degrees F) belting material – bonded back to back using our unique contiguous panel design, making the Eliason FLT-400 the most durable flexible traffic door available. Jamb edge balloon seals, top and bottom wiper seals and large vision panels are all standard.

Suitable for cold storage warehouses, food processing facilities, general industrial applications and any other application where the best top-mounted flexible traffic door is desired.

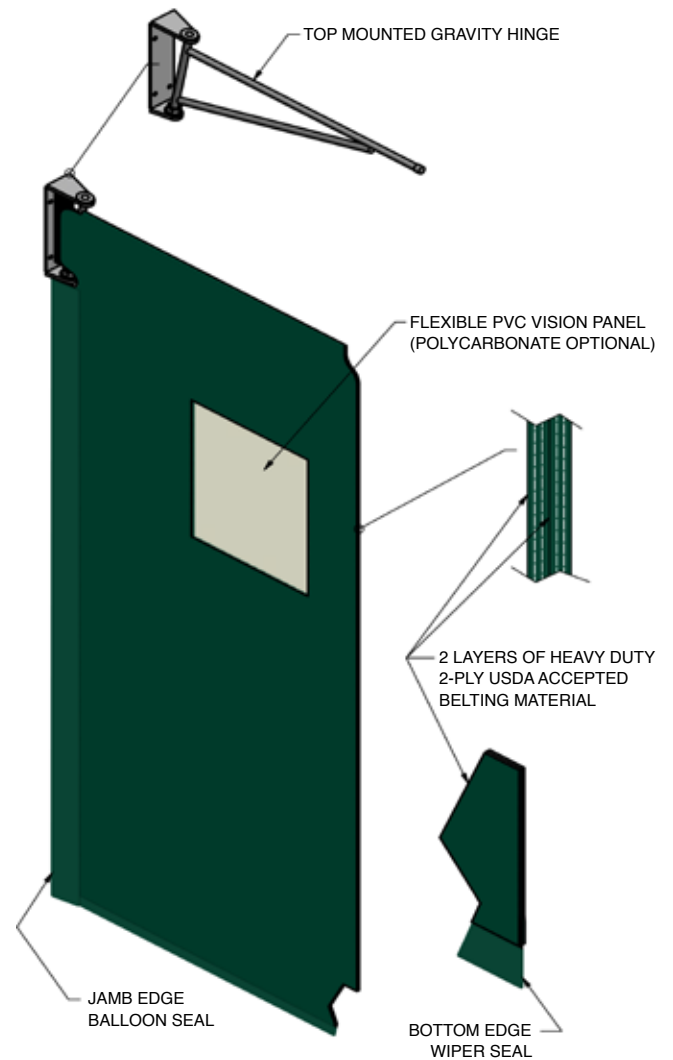

ELIASON®

# Eliason FLT-400 Doors

product **features**  
& specifications

Unsurpassed flexibility and durability for tough applications.

- **Top Mounted Only Gravity Hinge System**  
No bottom hinge to damage or maintain. Leaves full width in clear available for passage of wide loads.
- **Two Layers of Two-Ply Low Temp USDA Accepted Belting Material**  
Flexible and forgiving, abrasion and impact resistant. Suitable for food processing and wash-down areas as well as low temperature applications.
- **Contiguous Panel Construction**  
Our unique panel design maximizes panel strength and durability.
- **Standard Jamb Edge Balloon Seals, Top and Bottom Wiper Seals**  
Provide the best seal possible in a flexible impact traffic door.
- **Large Clear Flexible Vision Panels**  
Maximizes visibility and safety.
- **Tough Durable Design**  
Suitable for heavy motorized traffic.

## Specifications

**DOOR BODY:** Two layers of flexible, abrasion-resistant, USDA accepted belting material bonded back to back with jamb edge balloon seals and wiper seals at top and bottom of each door panel. Large flexible PVC vision panels for maximum visibility. Hinge pocket is reinforced with vinyl-coated nylon material. Bi-parting models have 3" overlap at center.

**HINGES:** Eliason heavy-duty, top mounted, gravity-operated hinges allow the door panels to open easily and close automatically. Top mounted only design leaves maximum WIC available for passage of wide loads.

**APPLICATIONS:** Cold Storage Facilities (Temperatures to -30°F); Walk-In Coolers & Freezers; Food Processing Facilities; Shipping and Receiving Areas; High Volume Industrial Openings.
